

Jean R. Johnsen

Advanced Automation Engineer

Hedehusene, Denmark | +45 28 90 58 07 | jrj@hojfrekvens.xyz | cv.hojfrekvens.xyz

PROFILE

Advanced Automation Engineer with hands-on experience in ABB 800xA, PCS/DCS application work, and software for technical systems where reliability and clarity matter. Builds and tests automation solutions for GMP-regulated pharmaceutical production at NNE, after delivering ABB 800xA solutions at Tipatek and working close to production at Novo Nordisk in Kalundborg. Brings a practical, GMP-aware mindset to complex pharmaceutical automation projects.

EXPERIENCE

NNE

Advanced Automation Engineer

Sep 2026 – Present

Kalundborg, Denmark

- Design, configure, and test PCS/DCS automation applications for GMP-regulated pharmaceutical production.
- Deliver robust automation solutions with focus on reliability, structured verification, and clear documentation.
- Work cross-functionally close to production to support quality-critical operations.

Tipatek A/S

Junior Automation Engineer

Mar 2025 – Aug 2026

Odense, Denmark

- Developed, configured, and tested ABB 800xA automation solutions, including control logic, system configuration, and operator interfaces.
- Supported structured verification, troubleshooting, and quality-focused delivery of industrial automation systems.

Novo Nordisk A/S

Process Operator and IT / Automation Projects

Aug 2022 – Feb 2025

Kalundborg, Denmark

- Worked in day-to-day operation of process equipment in pharma production, including troubleshooting and repair in a quality-critical environment.
- Contributed to PTFE valve analysis and piping optimization with focus on process robustness and maintainability.
- Supported automation and IT improvement efforts through testing, practical problem solving, and collaboration close to production.

Netcompany

Freelance Software Architect

Jan 2021 – Jun 2022

Remote

- Delivered mobile and web solutions for Danish clients with focus on system design, maintainability, and secure implementation.
- Worked across C#, backend architecture, and technical decision-making for both small and larger customer projects.

Level 3 Technologies

Junior Software Engineer

Dec 2017 – Oct 2018

Odense, Denmark

- Built internal modules, scripts, and prototype tooling that improved technical workflows and sped up proof-of-concept work.
- Developed a method for comparing cause-and-effect diagrams with real shutdown events, reducing analysis effort and strengthening traceability.

EDUCATION

SIMAC

Bachelor of Technology in Marine Engineering

Jan 2025 – Present

Svendborg, Denmark

Processkolen

EUD - Process and Optimization

Aug 2022 – Jan 2025

Kalundborg, Denmark

University of Southern Denmark

Bachelor of Science in Computer Science

Sep 2016 – Jan 2020

Odense, Denmark

TECHNICAL SKILLS

Automation: ABB 800xA, ABB SattLine, control logic, operator interfaces, system testing, troubleshooting, technical documentation

Pharma and production: GMP-aware work close to production, process equipment, LMES, PAS-X, cross-functional collaboration

Programming: C#, Java, Python, Rust

Tools and languages: Git, GitLab, Danish, English

ADDITIONAL EXPERIENCE

TV2: Student Developer and Data Analyst in a broadcasting environment (2016 – 2017)

Hauch's Fysiske Cabinet: Web Developer and Guide, combining technical work with communication (2015)

Adidas & Team Danmark: Former elite athlete with national and international 800m competition experience (2017 – 2020)

BHS-PL Beton: Former continental and danish A series cyclist (2022 – 2025)
